

Oracle Analytics Front End Training

Our Oracle Analytics (OAC and OAS) Front End training is a 3-day course consisting of lessons and labs. It assumes no prior knowledge and is designed to give you a comprehensive understanding of analysing data using the Oracle Analytics platform, ranging from structured fixed-format reporting through to open-ended self-service data exploration.

Duration

3 days

Structure

Instructor led lessons with labs in a dedicated environment

Who Should Attend?

Report Writers, End Users, Business Analysts, Data Analysts, and BI Developers

Dates

Tuesday 7th September to Thursday 9th September 2021

Benefits

- ✓ The full 3-day course will be instructor led in real-time
- ✓ Gives you the understanding and ability to perform real-world data analysis.
- ✓ 6-month access to Rittman Mead's on-demand training included.

"The labs were very helpful as it was good to gain experience of the tools used. It was interesting doing an interactive online course which was highly engaging."

"As a remote learning course I thought it was very well organised."

Agenda

We have built this course to give you a deep understanding and ability to perform real-world data analysis in Oracle Analytics.

- **Day 1** starts with interactive reporting and covers creating basic and advanced analyses and dashboards.
- **Day 2** takes this further with actionable intelligence and fixed-format published reporting.
- **Day 3** focuses on data exploration and visualisation, starting with self-service reporting and finishing augmented analytics and machine learning.

We aim to equip you with the tools you need to master all aspects of analysis within Oracle Analytics.
